

**Los Angeles County Public Works
Environmental Programs Division
SUPPLEMENT APPLICATION FOR
TEMPORARY CLOSURE**

PW USE ONLY:	
SITE-FILE NO. _____	RC _____
APPLICATION NO. _____	

This supplement must be submitted with the Application For Closure. You must notify this office two working days in advance to schedule an appointment for an inspection of the temporary closure.

Pursuant to California Code of Regulations (CCR), Title 23, Division 3, Chapter 16, Article 7:

1. All residual liquid, solids, or sludges shall be removed and handled in accordance with the applicable provisions of Chapter 6.5 and Chapter 6.7 of Division 20 of the California Health and Safety Code (CH&SC). Copies of all completed hazardous waste manifests and bills of lading must be provided to this office prior to final approval of temporary closure.
2. If the underground storage tank(s) contained a hazardous substance that could produce flammable vapors at standard temperature and pressure, then the underground storage tank(s) shall be inerted, as often as necessary, to levels that will preclude an explosion or to such lower levels as may be required by this office.
3. The underground storage tank(s) may be filled with a noncorrosive liquid that is not a hazardous substance. This liquid shall be tested and the test results submitted to this office prior to removal from the underground storage tank at the end of the temporary closure period.
4. Except for required venting, all fill and access locations and piping shall be sealed using locking caps or concrete plugs.
5. Power service shall be disconnected from all pumps associated with the use of the underground storage tank(s) unless the power services some other equipment which is not being closed, such as the impressed-current cathodic protection system, and/or the monitoring system and sensors.
6. The underground storage tank(s) shall be inspected by the owner or operator at least once every three months to verify that the temporary closure measures are still in place. The inspection shall include at least the following actions:
 - a. Visual inspection of all locked caps and/or concrete plugs.
 - b. If locking caps are used, at least one shall be removed to determine if any liquids or other substances have been added to the underground storage tank(s) or if there has been a change in the quantity or type of liquid added.

All approved monitoring requirements remain in place throughout the duration of the Temporary Closure. Monitoring equipment must continue to be certified annually.

Other:

The owner may terminate the temporary closure at any time and reuse the underground storage tank(s) only if the USTs meet the requirements of CH&SC Division 20, Chapter 6.7, CCR Title 23, Division 3, Chapter 16 and with approval from this office. The Temporary Closure will expire 180 days from date of issuance (County Code 11.82.020 B). The Temporary Closure may be extended for an additional 180 days for one half the Closure Permit fee. At the conclusion of 12 months the extended Temporary Closure Permit is expired. Pursuant to CCR Title 23, Division 3, Chapter 16 Section 2670 (b), at the end of 12 consecutive months during which the tank is temporarily closed, this office may approve an extension of the temporary closure period for a maximum additional period of up to 12 months. Owners and operators shall complete a site assessment in accordance with CCR Title 23, Division 3, Chapter 16, Section 2672 (d) before an extension may be granted by this office.
